

# **IB-K Interface Board**

**Electronic Circuit Board** 

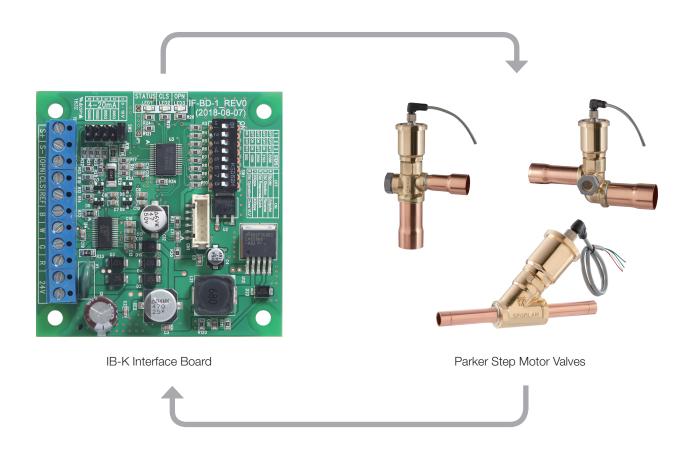

# Introduction

The IB-K is developed to be applicable in Korea and various markets. It is also applicable to Parker Sporlan products and all step motor valves manufactured in Korea and China.

The IB-K is a small electronic circuit board that extends the functionality of an external system controller to drive step motor valves.

The external controller must provide an analog 0-10VDC or 4-20mA signal to the IB-K.
